

# Response to Additional Feature Requests

## Flick MVP Development

**To:** Good Monkeys LLC  
**From:** Saddam - Founder, CodeFlow Studios  
**Date:** January 10, 2025  
**Subject:** Response to Additional Feature Requests - Flick MVP Development

---

Dear Good Monkeys LLC Team,

Thank you for these excellent feature suggestions! Your vision for the Flick app shows great forward-thinking. I'm pleased to address each of your requests and explain how we'll approach them within our MVP scope while setting the foundation for future expansion.

### 1. QR Code Scanning Enhancement ■ INCLUDED

Your QR code behavior specification is **excellent** and we're excited to implement this comprehensive flow:

- Native iOS camera QR scanning with deep linking to the app
- Web-based QR landing pages for non-app users
- Smart routing based on lighter registration status
- "Lost/Found" decision interface for registered lighters
- "Download app" promotion for unregistered lighters
- In-app QR scanner remains available for registered users

This creates a seamless user experience that encourages app downloads while providing immediate value to anyone who finds a lighter.

### 2. Ownership History Feature ■ INCLUDED

The ownership history concept adds tremendous value to the community aspect of Flick:

- Ownership chain tracking in our database schema
- Privacy-respecting display (only public profiles shown)
- Clean timeline view: "X → A → B → You"

- Optional privacy settings for each user
- Integration with existing trade/lost & found workflows

This feature will make each lighter's journey feel more personal and engaging for users.

### **3. Location Update Feature ■ INCLUDED**

Your proactive location tracking approach is innovative:

- Smart push notifications asking "Is your lighter with you?"
- One-tap responses (Yes/No)
- Automatic location updates when user confirms
- Follow-up "Is it lost?" flow for missing lighters
- Non-intrusive frequency (max 1-2 prompts per week)
- Respects user privacy and battery life

This will significantly improve the lost & found success rate while keeping the experience user-friendly.

## 4. Social Feed Architecture ■ FUTURE-READY

**MVP Foundation:** We'll structure our backend and database to support social features from day one:

- Database Design: Activity log tables for trades, lost/found events, achievements
- API Architecture: Event-driven system ready for feed generation
- User Interaction Tracking: All actions logged for future social features
- Scalable Infrastructure: Built to handle increased social activity

**Future Expansion Ready:** When you're ready to add social feeds, we'll have all the data and infrastructure in place for a smooth implementation.

## 5. goodmonkeys.com Landing Website ■ ENHANCED SCOPE

Your dual-purpose website concept is perfect for brand building:

- Company Section: About Good Monkeys LLC, mission, team
- Flick App Section: App introduction, features showcase, download buttons
- Contact Form: Professional contact system with email forwarding
- Responsive Design: Mobile-optimized for all devices
- SEO Optimized: Ready for search engine visibility
- Integrated Experience: Seamless flow between company info and app promotion

This creates a professional presence that serves both your company brand and Flick app marketing needs.

### ■ Updated MVP Scope Summary

All your requested features are now included in our \$13,500 MVP development:

Core Features	Technical Foundation
■ iOS App with native QR scanning + web fallback	■ Social-ready database architecture
■ User profiles with privacy controls	■ Scalable API design
■ Ownership history tracking	■ Event logging for future features
■ Smart location update system	■ Privacy-first user controls
■ Lost & found workflow	
■ Trading & gifting system	

■ Basic gamification	
■ Admin dashboard	
■ Enhanced goodmonkeys.com website	

## ■ Investment Confirmation

**Total cost remains \$13,500** - we're excited to include these valuable features at no additional cost because they align perfectly with our vision for Flick's success.

## ■ Next Steps

1. Confirm approval of this enhanced scope
2. Schedule kickoff call to finalize technical details
3. Begin development November 1-7, 2025

We're genuinely excited about these enhancements - they'll make Flick a truly innovative and engaging platform that users will love. Your vision for community-driven lighter tracking is going to create something special.

Thank you for trusting CodeFlow Studios with this exciting project!

Best regards,

**Saddam**
